Tomasz Wrobel

DevOps / Platform Engineer

SUMMARY

Platform engineer with seven years of experience running Kubernetes on AWS and automating delivery for product teams. Focused on repeatable infrastructure, fast pipelines and calm on-call rotations.

WORK EXPERIENCE

Senior DevOps Engineer, Stratus Commerce

Apr 2022 - Present · Warsaw, Poland

- Maintained CI pipelines in GitHub Actions for 60+ repositories.
- Participated in the on-call rotation and handled production incidents.
- Managed Kubernetes clusters on EKS and upgraded them across four minor versions without downtime.
- Wrote Terraform modules for networking, EKS and RDS, adopted by all product teams.
- Reduced average build time from 18 to 6 minutes through caching and parallel jobs.
- Responsible for monitoring with Prometheus and Grafana, and for cost reviews.

DevOps Engineer, Nordlight Games

Feb 2019 - Mar 2022 · Gdansk, Poland

- Took part in release management and supported developers with deployment issues.
- Led the move of about 200 hand-built AWS resources into Terraform, removing configuration drift.
- Built a GitLab CI/CD platform with canary deployments for the game backend services.
- Ran the on-call rotation for matchmaking services during three major game launches.

Systems Administrator, Baltic Hosting

Jul 2017 - Jan 2019 · Gdansk, Poland

- Administered around 120 Linux servers, handled backups, patching and user requests.
- Wrote Ansible playbooks that replaced manual server provisioning.

SELECTED PROJECTS

- **Cluster Cost Dashboard** - internal Grafana dashboard and exporter that attributes Kubernetes spend per team; led to a 22% cut in idle capacity.
- **Self-Service Preview Environments** - Helm and Argo CD based system that creates a short-lived environment for every pull request.
